

HAYES MEADOW PRIMARY SCHOOL

INFORMATION SECURITY POLICY 2023

1. Introduction

- Information security is about what you and the School should be doing to make sure that School Personal Data is kept safe. This is the most important area of data protection to get right.
- This policy should be read alongside the School's Data Protection Policy which gives an overview of your and the School's obligations around data protection. The School's Data Protection Policy can be found in the school's Policy Folder and on the school website. In addition to the Data Protection Policy, you should also read the following which are relevant to data protection:
 - i. IT acceptable use policy
 - ii. Privacy Notice for Parents
 - iii. Privacy Notice for Pupils
 - iv. Privacy Notice for Staff
- This policy applies to all staff (which includes Governors, agency staff, contractors, work experience students and volunteers) when handling School Personal Data. For more information on what School Personal Data is, please see the School's Data Protection Policy.
- Any questions or concerns about your obligations under this policy should be referred to the Data Protection Officer. Questions and concerns about technical support or for assistance with using the School IT systems should be referred to the Headteacher.

2. Be aware

- Information security breaches can happen in a number of different ways: Examples of breaches which have been reported in the news include:
 - i. unencrypted laptop stolen after being left on a train;
 - ii. Personal Data taken after website was hacked;
 - iii. Sending a confidential email to the wrong recipient;
 - iv. Leaving confidential documents containing Personal Data in a public place
 - v. Using carbon copy rather than blind carbon copy to send emails to multiple recipients.
- These should give you a good idea of the sorts of things which can go wrong, but please have a think about what problems might arise in school and what you can do to manage the risks. Speak to a member of the SMT and the Data Controller if you have any ideas or suggestions about improving practices in school.
- You should report all security incidents, breaches and weaknesses to the Information Commissioner's Office within 72 hours of becoming aware of a breach. This includes anything which you become aware of even if you are not directly involved (for example, if you know that document storage rooms are sometimes left unlocked at weekends).
- You must immediately tell the Data Protection Officer and the computing co-ordinator if you become aware of anything which might mean that there has been a security breach. For example, if:
 - i. You accidentally send an email to the wrong recipient;

-
- ii. You cannot find some papers which contain School Personal Data;
 - iii. Any device (such as a laptop or an ipad) used to access or store School Personal Data has been lost or stolen or you suspect that the security of a device has been compromised.

3. Critical School Personal Data

- Data protection is about protecting information about individuals. Even something as simple as a person's name or their hobbies count as their Personal Data. However, some Personal Data is so sensitive that we need to be extra careful. This is called **Critical School Personal Data** in this policy. Critical School Personal Data is:
 - i. Information concerning child protection matters;
 - ii. HR files for all staff members;
 - iii. Information about serious or confidential medical conditions and information about special educational needs;
 - iv. Information concerning serious allegations made against an individual (whether or not the allegation amounts to a criminal offence and whether or not the allegation has been proved);
 - v. Financial information (for example about parents and staff);
- Information about an individual's racial or ethnic origin, political opinions, religious beliefs or other beliefs of a similar nature, trade union membership, physical or mental health or condition, sexual life and information relating to actual or alleged criminal activity;
- Staff need to be extra careful when handling Critical School Personal Data.

4. Using computers and IT

- A lot of data protection breaches happen as a result of basic mistakes being made when using the School's IT system. Here are some tips on how to avoid common problems.
- **Lock computer screens:** Your computer screen should be locked when it is not in use, even if you are only away from the computer for a short period of time. To lock your computer screen press ctrl, alt and delete and choose 'lock computer'. If you are not sure how to do this then speak to the computing co-ordinator.
- **Be familiar with the School's IT:** You should also make sure that you familiarise yourself with any software or hardware that you use. In particular, please make sure that you understand what the software is supposed to be used for and any risks. For example: if you use a "virtual classroom" which allows you to upload lesson plans then you need to be careful that you do not accidentally upload anything more confidential;
- You need to be extra careful where you store information containing Critical School Personal Data, if in doubt, speak to the Data Protection Officer.
- Specific information on the different programmes that the School uses can be obtained from the computing co-ordinator.
- The computing coordinator is responsible for ensuring all remote programs such as 'TT Rockstars' etc are GDPR compliant and have relevant policies in place.
- **Hardware and software not provided by the School:** Staff must not use, download or install any software, app, programme, or service without permission from the computing co-ordinator or the Head Teacher. Staff must not connect (whether physically or by using

another method such as Wi-Fi or Bluetooth) any device or hardware to the School IT systems without permission.

- **Private cloud storage:** You must not use private cloud storage or file sharing accounts to store or share School documents.
- **Portable media devices.** The use of portable media devices (such as USB drives, portable hard drives, DVDs) is not allowed unless those devices are password protected.
- **Disposal of School IT equipment:** School IT equipment (and this includes laptops, printers, phones, and DVDs etc) must always be disposed of through a reputable company and a paper trail of disposal must exist.
- **Monitoring of IT systems:** All school staff are required to sign the acceptable use policy. Individual computers and logins are monitored and 'capture reports' are sent to the Headteacher on a weekly basis. The Headteacher has the right to ask staff about any captures which may have occurred against their login names. School machines should not be used for personal use or to send personal emails. Any information stored or accessed via the school computers are not private. For example, in the case of absence the Headteacher may require access to files or work related emails.

5. Passwords

- Passwords should be a mix of uppercase and lowercase, numbers and special characters (i.e. #, &, !), should be at least eight characters in length and should not be disclosed to anyone else.
- Your password should be difficult to guess, for example, you could base your password on something memorable that no-one else would know.
- Passwords (and any other security credential you are issued with such as a key fob or USB drive) must be kept secure and confidential and must not be shared with, or given to, anyone else. Passwords should not be written down.

6. Emails (and faxes)

- When sending emails or faxes you must take care to make sure that the recipients are correct.
- If a fax contains Critical School Personal Data then you must make sure that the intended recipient is standing by the fax machine to receive the fax.
- **Encryption:** Remember to encrypt emails which contain Critical School Personal Data. For example, encryption should be used when sending details of a safeguarding incident to social services. If you need to give someone the "password" to unlock an encrypted email or document then this should be provided via a different means. For advice on encryption please speak to the computing co-ordinator. For example, after emailing the encrypted documents you may wish to call them with the password.
- **Private email addresses:** You must not use a private email address for school related work. You must only use your ...@hayesmeadow.staffs.sch.uk address. You must not forward emails which include 3rd party private email addresses, either as recipient, or as sender.

7. Paper files

- **Keep under lock and key:** Staff must ensure that papers which contain School Personal Data are kept under lock and key in a secure location and that they are never left unattended on desks (unless the room is secure). Any keys must be kept safe.

- If the papers contain **Critical School Personal Data** then they must be kept in secure cabinets when not being used as set out in the table below. Information must not be stored in any other location, for example, child protection information should only be stored in the HT office, in locked drawers or cupboards.

Cabinet	Access
Child protection - located in HT office	Key kept in Secure location
Financial Information – located in the school office	Key kept in School Office
Health Information – located in School Office	Key kept in School Office
SEND information – located in HT office	Key kept in Secure location
IEP folders and teachers’ record files – secure location in classrooms during term time; school office during holidays	Key kept in School Office

- **Disposal:** Paper records containing School Personal Data should be disposed of securely by placing them in confidential waste bags which are located in the School Office or shredded by the shredder in the school office. School Personal Data should never be placed in the general waste.
- **Printing:** When printing documents, make sure that you collect everything from the printer straight away, otherwise there is a risk that confidential information might be read or picked up by someone else. If you see anything left by the printer which contains School Personal Data then you must hand it in to the Office Manager.
- **Put papers away:** You should always keep a tidy desk and put papers away when they are no longer needed.

8. Working off site (e.g., School trips and homeworking)

- Staff might need to take School Personal Data off the School site for various reasons, for example because they are working from home or supervising a School trip. This does not breach data protection law if the appropriate safeguards are in place to protect School Personal Data.
- For School trips, the trip organiser should decide what information needs to be taken and who will be responsible for looking after it.
- If you are allowed to work from home then check with the Data Protection Officer what additional arrangements are in place.
- **Take the minimum with you:** When working away from the School you must only take the minimum amount of information with you. For example, a teacher organising a field trip might need to take with her information about pupil medical conditions (for example allergies and medication etc). If only eight out of a class of twenty pupils are attending the trip, then the teacher should only take the information about the eight pupils.

-
- **Working on the move:** You must not work on documents containing School Personal Data whilst travelling if there is a risk of unauthorised disclosure (for example, if there is a risk that someone else will be able to see what you are doing). For example, if working on a laptop on a train, you should ensure that no one else can see the laptop screen and you should not leave any device unattended where there is a risk that it might be taken.
 - **Paper records:** If you need to take hard copy (i.e. paper) records with you then you should make sure that they are kept secure. For example, if travelling by train you must keep the documents with you at all times and they should not be stored in luggage racks. If travelling by car, you must keep the documents out of plain sight if left unattended. Documents should be kept in a locked case. They should also be kept somewhere secure in addition to being kept in a locked case if left unattended (e.g. overnight). If taking pupils profile records off site, these must be signed out and signed back in on return.
 - **Public wifi:** You must not use public wifi to connect to the internet. For example, if you are working in a cafe then you will either need to work off-line or use 3G/4G.
 - **Using School ipads, phones, cameras and other devices:** If you need to book out a School device then inform the computing co-ordinator.

9. Using personal devices for School work

- You may only use your personal device (such as your laptop or smartphone) for School work if you have been given permission by the Data Protection Officer.
- **Appropriate security measures** should always be taken. This includes the use of firewalls and anti-virus software. Any software or operating system on the device should be kept up to date.
- **Sending or saving documents to your computer:** Documents containing School Personal Data should not normally be sent to or saved to personal devices, unless you have been given permission by the Headteacher. This is because anything you save to your computer will not be protected by the School's security systems. Furthermore, it is often very difficult to delete something which has been saved to a computer. For example, if you saved a School document to your laptop because you wanted to work on it over the weekend, then the document would still be on your computer hard drive even if you deleted it and emptied the recycle bin.
- **Friends and family:** You must take steps to ensure that others who use your device (for example, friends and family) cannot access anything school related on your device. For example, you should not share the login details with others and you should log out of your account once you have finished working by restarting your device. You must also make sure that your devices are not configured in a way that would allow someone else access to School related documents and information – if you are unsure about this then please speak to the computing co-ordinator.
- **When you stop using your device for School work:** If you stop using your device for School work, for example:
 - i. If you decide that you do not wish to use your device for School work; or
 - ii. If the School withdraws permission for you to use your device;

-
- iii. If you are about to leave the School then, all School documents (including School emails), and any software applications provided by us for School purposes, will be removed from the device.
 - If this cannot be achieved remotely, you must submit the device to the computing co-ordinator for wiping and software removal. You must provide all necessary co-operation and assistance to the computing co-ordinator in relation to this process.

10. Breach of this policy

- Any breach of this policy will be taken seriously and may result in disciplinary action. (See Data Protection Policy)
- A member of staff who deliberately or recklessly discloses School Personal Data held by the School without proper authority is also guilty of a criminal offence and gross misconduct. This could result in summary dismissal, and a personal liability.
- This policy does not form part of any employee's contract of employment.
- We reserve the right to change this policy at any time. Where appropriate, we will notify staff of those changes by mail or email.

I confirm that I have read and understood the contents of the Information Security Policy:
